

Q&A Eternity Finish*

Q: What is the Eternity Finish?

A: The Eternity Finish is a proprietary multi-step finish that includes a highly effective wood treatment which beautifies and protects outdoor wood.

Q: Many products claim to be safe to use, what makes the Eternity Finish so different?

A: Over time and with exposure to the sun and rain, the finished wood develops a beautiful silver to dark brown patina. This natural patina is a weathering process that provides outstanding protection, is VOC-Free and 100% natural.

Q: Lots of products for the exterior wood claim to be no-maintenance, but in fact have to be re-applied within 2-3 years. What does The Eternity Finish mean by no-maintenance?

A: No-maintenance means only one factory applied treatment is required. The finish can not be worn off, will not peel or fade. Natural weathering actually increases it's beauty and effectiveness.

Q: What is the Eternity Finish made of?

A: The Eternity Finish treatment is made up of naturally occurring plant and mineral substance. The solution soaks in and penetrates wood fibers. Independent laboratory testing confirms that it creates no harmful residue in soil or water.

Q: Will the Eternity Finish prevent wood from cracking & warping?

A: No. All wood contains moisture and dries during exposure to sun and wind. The finish will neither prevent nor cause additional cracking or checking in the wood.

Q: Can I apply sealers or colored stains over The Eternity Finish?

A: Yes you can, but expect additional maintenance with those sealers or stains.

- Leaves no harmful residue in soil or water
- In use for over 60 years with proven results
- Safe for use around gardens
- Safe for children and play areas
- Ideal for posts, log homes, sheds, doors, aging, graying and more

The Eternity Finish is a proprietary multi-step finish that includes a treatment that is made up of naturally occurring plant and mineral substances, combined in a special, 60 year old recipe handed down through generations of a family of craftsmen.

As the years pass, the finish gets better and better in spite of and because of the elements that normally cause the finish to deteriorate. It gives wood an attractive silver patina with variations depending on the type of wood. Over time and with exposure to the elements, through the treatment process, the natural patina is enhanced with a silver quality. If a new piece of wood is treated and installed along side older treated wood (i.e. fence board/panel) the new wood will soon blend with the old.

The treatment included in the Eternity finish contains absolutely no solvents and is completely harmless to all living things. The natural substances penetrate the wood fibers, permanently modifying the wood structure. Independent laboratory testing confirms that the finish neither creates nor leaves behind no harmful residue in soils and water.

The Eternity Finish is a factory applied application that cannot be worn off, will not peel or fade.

Lake States Lumber, nor the manufacturer provides an expressed or implied warranty for the Eternity Finish. Statements about the performance and composition of the finish are directly from the manufacturer. Lake States Lumber by using this finish or the Eternity Finish name assumes liability for the product.
