To Whom it Concerns:

Please be advised that the wood treating facility of Innovative Pine Technology, Duluth, MN, is a member in good standing of the ICC Evaluation Service Program. Their personnel and facilities were initially certified and are continually monitored by Timber Products Inspection (TP), an accredited agency under the ICC Evaluation Service.

As a voluntary participant in the ICC Evaluation Service Program, Innovative Pine Technology undergoes regular unannounced inspections from TP, which includes conformance to applicable portions of the ICC Specifications. Compliance to the ICC Specifications gives Innovative Pine Technology the right to apply the official ICC/TP Quality Mark to material they process through the program.

TP is pleased to have Innovative Pine Technology as a subscriber.

Please direct any questions to me at (770) 922-8000, extension 499.

Sincerely,  
TIMBER PRODUCTS INSPECTION, INC.

Jeremy L. Williams  
Manager, Treated Wood Division
